PROJECTS

Meta Capstone Project

Created a demo website for an imaginary restaurant based on **React JS**, **Chakra UI** and **Formik**. Created a table reservation feature for the restaurant which calls the API. In the process, learnt to build controlled forms, client-side validation and state management using hooks in React.

Hypertensive.io

Created an open-source blood pressure tracking application using **React JS** and **css** libraries like **Chakra UI** and **Tailwind**. Learnt to build functional and responsive data tables.
