PROJECTS

Hypertensive.io(https://hypertensive-io.netlify.app)

It is an open-source application which helps in keeping record of individual's blood pressure data and analyses it. Technolgies used in building: **React JS, HTML, CSS, Chart JS & CSS libraries (Chakra UI & Tailwind).** Learnt to build functional and responsive data tables and analyse the data via charts. Project is live.

Meta Capstone Project

It is demo website for an imaginary restaurant. Created a table reservation feature for the restaurant which calls the provided API. The project focusses on controlled forms, client-side validations and state management using React hooks. Technologies used: **React JS, Formik, HTML & CSS library such as Chakra UI.**
