Grade: 93.5%

ICSE (2012)
Vivekananda Mission School, Kolkata
Grade: 93%

PROJECTS

Hypertensive.io (https://hypertensive-io.netlify.app)

TECHNOLOGIES USED: React JS, Chakra UI & Tailwind, ChartJS

It is an open-source blood pressure tracking web app, a dynamic creation powered by React JS, styled with elegance using CSS frameworks like Tailwind and Chakra UI. It boasts a responsive data input table, insightful pie and line chart analysis, and offers a user-friendly dark/ light mode. Your health, visualized with precision.

META Capstone Project

TECHNOLOGIES USED: React JS, Formik, Chakra UI.

My capstone project showcases a table booking system crafted with finesse, merging Formik, Chakra UI, and React. Leveraging Meta's API, it dynamically provides available timeslots based on selected dates. Additionally, I designed an inviting restaurant landing page. Seamlessly blending user experience and functionality for a holistic dining reservation solution.

EXPERIENCE

Sbicap Securities Ltd.

June, 2021 - August, 2022   📍 Kolkata,India
